Supplemental cash flow information (note 12)

See accompanying notes to consolidated financial statements.

1. General:

Seaspan Corporation (“Seaspan” or the “Company”) was incorporated on May 3, 2005 in the Marshall Islands and owns and operates containerships pursuant to primarily long-term, fixed-rate time charters to major container liner companies. Seaspan is a wholly owned subsidiary of Atlas Corp. (“Atlas”).

2. Significant accounting policies:

(a) Basis of presentation:

Except for the changes described in note 2(b), the accompanying interim financial information of Seaspan has been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”), on a basis consistent with those followed in the December 31, 2021 audited annual consolidated financial statements of Seaspan. The accompanying interim financial information is unaudited and reflects all adjustments, consisting of normal recurring adjustments, which, in the opinion of management, are necessary for a fair presentation of results for the interim periods presented.

(b) Recent accounting pronouncements:

Discontinuation of LIBOR

In 2021, the Company adopted ASU 2020-04, “Reference Rate Reform (Topic 848)”, prospectively to contract modifications. The guidance provides optional relief for the discontinuation of LIBOR resulting from rate reform. Contract terms that are modified due to the replacement of a reference rate are not required to be remeasured or reassessed under FASB’s relevant U.S. GAAP Topic. The election is available by Topic. The Company has elected to apply the optional relief for contracts under ASC 470, “Debt”, ASC 840 and 842, “Leases”, and ASC 815, “Derivatives and Hedging”. There was no impact to the Company’s financial statements upon initial adoption. The LIBOR replacement modifications for Debt contracts will be accounted for by prospectively adjusting the effective interest rate in the agreements. Existing lease and derivative contracts will require no reassessments. Transition activities are focused on the conversion of existing LIBOR based contracts to the Secured Overnight Financing Rate.

Debt with conversion and other options

Effective January 1, 2022, the Company adopted ASU 2020-06, “Debt – Debt with Conversion and Other Options (Subtopic 470-20)” (“ASU 2020-06”), using the modified retrospective method, whereby the cumulative effect adjustment was made as of the date of the initial application. Accordingly, financial information and disclosures in the comparative period were not restated. The impact of the adoption of ASU 2020-06 resulted in an adjustment of \$5,073,000 to opening retained earnings at January 1, 2022 related to the unamortized debt discount that was initially recorded when the convertible notes were issued. Under ASU 2020-06, the accounting for convertible debt instruments is simplified by reducing the number of accounting models and circumstances when embedded conversion features are separately recognized.

3. Related party transactions:

The income or expenses with related parties relate to amounts paid to or received from individuals or entities that are associated with the Company or with the Company’s directors or officers and these transactions are governed by pre-arranged contracts.

Over the course of 2018, 2019 and 2020, the Company issued to Fairfax Financial Holdings Limited and certain of its affiliates (“Fairfax”) an aggregate \$600,000,000 of 5.50% senior notes due in 2025, 2026 and 2027 (the “Fairfax Notes”) and warrants to purchase an aggregate 101,923,078 common shares of the Company. Two tranches of warrants, each for 38,461,539 common shares, were exercisable at a price of \$6.50 per share. One tranche of warrants, for 25,000,000 common shares, was exercisable at a price of \$8.05 per share. All such warrants have been exercised.

3. Related party transactions (continued):

In June 2021, Atlas and the Company exchanged and amended \$300,000,000 of the Fairfax Notes for (i) 12,000,000 Series J 7.00% Cumulative Redeemable Perpetual Preferred Shares of Atlas, representing a total liquidation value of \$300,000,000, and (ii) warrants to purchase 1,000,000 common shares of Atlas. The exchanged Fairfax Notes were subsequently cancelled and, in August 2021, the Company redeemed for cash the remaining Fairfax Notes at a redemption price equal to 100% of the principal amount plus any accrued and unpaid interest.

Transactions with Atlas Corp.

The Company makes dividend payments to Atlas on a quarterly basis to service Atlas's payment of dividends to holders of its common and preferred shares. During the three and six months ended June 30, 2022, the Company declared dividends of \$51,000,000 and \$98,500,000, respectively (2021 - \$75,000,000 and \$123,000,000, respectively) to Atlas.

During the three and six months ended June 30, 2022, Atlas made a capital contribution of \$100,000,000 to the Company (2021 - nil).

The Company routinely makes payments to cover expenses on behalf of Atlas. As of June 30, 2022, amounts due from Atlas are non-interest bearing, unsecured and have no fixed repayment terms. The Company provides certain management services to Atlas in exchange for a management fee. For the three and six months ended June 30, 2022, the management service revenue recognized from this arrangement was \$3,129,000 and \$5,714,000, respectively (2021 - \$2,435,000 and \$4,674,000, respectively).

During the three and six months ended June 30, 2022, Atlas granted 306,230 restricted stock units to certain members of senior management of Seaspan, under the Atlas Stock Incentive Plan.

As at June 30, 2022, the Company's 3.75% exchangeable senior unsecured notes due in 2025 ("Exchangeable Notes"), of which there was \$201,250,000 aggregate principal amount outstanding (December 31, 2021 - \$201,250,000) are exchangeable into common shares of Atlas.

(a) Revolving credit facilities:

In February 2022, the Company closed a new \$250,000,000, 3-year unsecured revolving credit facility which replaces a \$150,000,000 2-year unsecured revolving credit facility.

As at June 30, 2022, the Company had two revolving credit facilities available, which provided for aggregate borrowings of up to \$650,000,000 (December 31, 2021 – \$550,000,000), of which \$650,000,000 (December 31, 2021 - \$550,000,000) was undrawn.

The Company is subject to commitment fees ranging between 0.45% and 0.5% (December 31, 2021 – 0.5% and 0.6%) calculated on the undrawn amounts under the various facilities.

(b) Term loan credit facilities:

As at June 30, 2022, the Company has entered into \$3,369,376,000 (December 31, 2021 - \$3,838,853,000) of term loan credit facilities available, of which \$1,574,136,000 (December 31, 2021 - \$1,710,224,000) was undrawn.

Term loan credit facilities mature between December 31, 2022 and January 21, 2030.

For the Company's term loan credit facilities, except for three, interest is calculated on three month or six month LIBOR plus a margin per annum. The three month and six month average LIBOR was 1.4% and 0.9%, respectively (December 31, 2021 – 0.2% and 0.2%, respectively) and the margins ranged between 0.4% and 2.0% as at June 30, 2022 (December 31, 2021 – 0.4% and 2.3%).

For one of our term loan credit facilities with a total principal outstanding of \$20,812,000 (December 31, 2021 - \$27,198,000), interest is calculated based on the Export-Import Bank of Korea (KEXIM) rate plus 0.7% per annum.

For two of the term loan credit facilities with a total principal amount outstanding of \$8,821,000 (December 31, 2021 – \$10,923,000), interest is calculated based on a contractual rate of 3.8% per annum for both.

The Company is subject to commitment fees ranging between 0.2% and 0.5% (December 31, 2021 – 0.2% and 0.6%) calculated on the undrawn amounts under the various facilities.

The weighted average rate of interest, including the applicable margin, was 3.1% at June 30, 2022 (December 31, 2021 – 1.8%) for term loan credit facilities. Interest payments are made in monthly, quarterly or semi-annual payments.

(c) Sustainability-Linked Senior Secured Notes

On May 17, 2022, the Company entered into a note purchase agreement to issue, in a private placement, \$500,000,000 aggregate principal amount of fixed-rate, sustainability-linked senior secured notes. The notes comprise of three series, with interest rates ranging from 5.18% to 5.53% and maturities ranging from September 2032 to September 2037. The notes were issued on August 3, 2022.

(d) Credit facilities – other:

As of June 30, 2022, the Company’s credit facilities were secured by first-priority mortgages granted on 61 of its vessels, together with other related security. The security for each of the Company’s current secured credit facilities may include:

- A first priority mortgage on the collateral vessels funded by the related credit facility;
- An assignment of the Company’s time charters and earnings related to the related collateral vessels;
- An assignment of the insurance on each of the vessels that are subject to a related mortgage;
- An assignment of the Company’s related shipbuilding contracts and the corresponding refund guarantees;
- A pledge over shares of various subsidiaries; and
- A pledge over the related retention accounts.

As at June 30, 2022, \$1,222,734,000 principal amount of indebtedness under one of the Company’s term loan and revolving credit facilities, together with \$500,000,000 of sustainability-linked fixed rate notes with maturities from June 2031 to June 2036, was secured by a portfolio of 48 vessels, the composition of which can be changed and is subject to a borrowing base and portfolio concentration requirements, as well as compliance with financial covenants and certain negative covenants.

The Company may prepay certain amounts outstanding without penalty, other than breakage costs in certain circumstances. A prepayment may be required as a result of certain events, including without limitation the sale or loss of a vessel, a termination or expiration of a charter (and the inability to enter into a replacement charter acceptable to lenders within a prescribed period of time). The amount that must be prepaid may be calculated based on the loan to market value. In these circumstances, valuations of the Company’s vessels are conducted on a “without charter” basis as required under the credit facility agreement.

Each credit facility contains a mix of financial covenants requiring the Company to maintain minimum liquidity, tangible net worth, interest and principal coverage ratios and/or debt to assets ratios, as defined.

Certain facilities are guaranteed by an intermediate parent entity, in which case the parent entity must meet certain consolidated financial covenants under those term loan facilities including maintaining certain minimum tangible net worth, cash requirements and debt-to-asset ratios.

Some of the facilities also have an interest and principal coverage ratio, debt service coverage and vessel value requirement for the subsidiary borrower. The Company was in compliance with these covenants as at June 30, 2022.

16. Financial Instruments

(a) Fair value:

The carrying values of cash and cash equivalents, short-term investments, restricted cash, accounts receivable, accounts payable and accrued liabilities approximate their fair values because of their short term to maturity.

As of June 30, 2022, the fair value of the Company's revolving credit facilities and term loans excluding deferred financing fees was \$1,742,139,996 (December 31, 2021 – \$2,113,823,949) and the carrying value was \$1,795,239,822 (December 31, 2021 – \$2,128,628,523). As of June 30, 2022, the fair value of the Company's other financing arrangements, excluding deferred financing fees, was \$1,651,736,000 (December 31, 2021 – \$1,419,508,000) and the carrying value was \$1,631,794,000 (December 31, 2021 – \$1,363,098,000). The fair value of the revolving and term loan credit facilities and other financing arrangements, excluding deferred financing fees, are estimated based on expected principal repayments and interest, discounted by relevant forward rates plus a margin appropriate to the credit risk of the Company. Therefore, the Company has categorized the fair value of these financial instruments as Level 2 in the fair value hierarchy.

As of June 30, 2022, the fair value of the Company's senior unsecured notes was \$1,266,582,000 (December 31, 2021 – \$1,291,476,000) and the carrying value was \$1,250,000,000 (December 31, 2021 – \$1,250,000,000). The fair value of the Company's Exchangeable Notes was \$201,232,000 (December 31, 2021 – \$209,566,000) and the carrying value was \$201,250,000 (December 31, 2021 – \$201,250,000) or \$201,250,000 (December 31, 2021 – \$196,177,000) net of debt discount. The fair value of the Company's Senior Secured Notes was \$448,065,000 (December 31, 2021 – \$456,875,000) and the carrying value was \$500,000,000 (December 31, 2021 – \$500,000,000). The fair value is calculated using the present value of expected principal repayments and interest discounted by relevant forward rates plus a margin appropriate to the credit risk of the Company. As a result, these amounts are categorized as Level 2 in the fair value hierarchy.

The Company's interest rate derivative financial instruments are re-measured to fair value at the end of each reporting period. The fair values of the interest rate derivative financial instruments have been calculated by discounting the future cash flow of both the fixed rate and variable rate interest rate payments. The discount rate was derived from a yield curve created by nationally recognized financial institutions adjusted for the associated credit risk. The fair values of the interest rate derivative financial instruments are determined based on inputs that are readily available in public markets or can be derived from information available in publicly quoted markets. Therefore, the Company has categorized the fair value of these derivative financial instruments as Level 2 in the fair value hierarchy.

16. Financial Instruments (continued):

(a) Fair value (continued):

The exchange feature embedded in the Exchangeable Notes and capped calls entered into in connection with the Exchangeable Notes are derivatives measured at fair value at the end of each reporting period. The embedded exchange feature derivative is measured at fair value using a partial differential equation, with a Monte Carlo model for certain features. The capped call derivative is measured at fair value using a binomial tree. These models utilize observable and unobservable market data, including stock price, expected volatility, risk-free interest rate and expected dividend yield, as applicable. The embedded exchange feature and capped call derivatives are classified as Level 3 as the Company uses expected volatility that is unobservable and significant to the valuation. In general, an increase in Atlas's stock price or stock price volatility will increase the fair value of the embedded exchange feature and capped call derivatives which will result in an increase in loss and gain, respectively. As time to the expiration of the derivatives decreases, the fair value of the derivatives will decrease. The volatilities used as of June 30, 2022, for the embedded exchange feature were 43.25% and 30.39% for the capped call.

The fair value of the embedded exchange feature and capped calls resulting from a change in volatility are included below.

		10% increase in volatility		10% decrease in volatility
Embedded exchange feature	\$	3.9	\$	4.5
Capped calls		24.3		9.1

Unobservable inputs for recurring and non-recurring Level 3 disclosures are obtained from third parties whenever possible and reviewed by the Company for reasonableness.

(b) Interest rate swap derivatives:

As of June 30, 2022, the Company had the following outstanding interest rate derivatives:

Fixed per annum rate swapped for LIBOR	Notional amount as of June 30, 2022 (in millions of US dollars)	Maximum notional amount ⁽¹⁾ (in millions of US dollars)	Effective date	Ending date

(1) For the six months ended June 30, 2022 and 2021, cash flows related to actual settlement of interest rate swaps were \$11,358,000 and \$13,367,000. These are included in investing activities on the consolidated statements of cash flows.

(2) The effective portion of changes in unrealized loss on interest rate swaps was recorded in accumulated other comprehensive loss until September 30, 2008 when these contracts were voluntarily de-designated as accounting hedges. The amounts in accumulated other comprehensive loss are recognized in earnings when and where the previously hedged interest is recognized in earnings.

The estimated amount of AOCL expected to be reclassified to net earnings within the next 12 months is approximately \$1,019,000

17. Subsequent events:

- (a) On July 22, 2022, the Company declared dividends of \$86,124,000 on its commons shares to Atlas which was paid on July 25, 2022.
- (b) On August 3, 2022, the Company issued \$500,000,000 of sustainability-linked senior secured notes pursuant to a notes purchase agreement entered into in May 2022 (note 8(c)).
- (c) On July 18, 2022, the Company entered into a new \$200,000,000 interest rate swap for a term of 10 years with a fixed rate of 2.3875%, effective July 20, 2022. The Company concurrently terminated an existing \$125,000,000 interest rate swap.
- (d) On August 9, 2022, the Company voluntarily prepaid \$240,000,000 of a term loan facility under its vessel portfolio financing program.
- (e) On August 12, 2022, the Company exercised its option under an existing lease financing option to purchase one 10,000 TEU vessel. The purchase is expected to complete in September 2023 at the pre-determined purchase price of \$52,690,000.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND

RESULTS OF OPERATIONS

The following should be read in conjunction with the unaudited consolidated financial statements and related notes for the quarter ended June 30, 2022 included in this Report and the audited consolidated financial statements and related notes for the year ended December 31, 2021 filed with the U.S. Securities and Exchange Commission on an Atlas Corp. Form 6-K ("Seaspan Annual Filing"). Unless otherwise indicated, all amounts are presented in U.S. dollars, or USD. We prepare our consolidated financial statements in accordance with U.S. GAAP.

Overview

General

Seaspan was incorporated on May 3, 2005, in the Republic of the Marshall Islands. Seaspan is a leading independent charter owner and manager of containerships, which we charter primarily pursuant to long-term, fixed-rate time charters with major container liner companies. We primarily deploy our vessels on long-term, fixed-rate time charters to take advantage of the stable cash flow and high utilization rates that are typically associated with long-term time charters. As of June 30, 2022, we operated a fleet of 127 vessels that have an average age of approximately eight years, on a TEU weighted basis.

Customers for our operating fleet as at June 30, 2022 were as follows:

Customer for Current Fleet	Number of vessels under charter	TEUs under charter
CMA CGM	15	152,450
COSCO	25	231,000
Hapag-Lloyd	15	120,300
Maersk	19	86,250
MSC	11	127,000
ONE	23	207,530
Yang Ming Marine	15	210,000
ZIM	4	22,100
Total	127	1,156,630

Our primary objective for Seaspan is to continue to grow our containership leasing business through accretive vessel acquisitions as market conditions allow. Most of our customers' containership business revenues are derived from the shipment of goods from the Asia Pacific region to various overseas export markets in the United States and in Europe.

We use the term "twenty-foot equivalent unit", or TEU, the international standard measure of containers, in describing the capacity of our containerships, which are also referred to as our "vessels".

The following table summarizes key facts regarding Seaspan's fleet as of June 30, 2022:

Significant Developments During the Quarters Ended June 30, 2022 and Subsequent

Shipbuilding Contracts for Newbuild Containerships

As of June 30, 2022, Seaspan had entered into agreements with shipyards to build 67 newbuild containerships, as summarized in the following table:

	Newbuilds	Total TEU	Month Ordered
24000 TEU	2	48,000	February 2021
15000 TEU LNG	10	150,000	February 2021

7700 TEU LNG ⁽¹⁾	4	30,800	May 2022
Total	67	793,800	

⁽¹⁾ As at June 30, 2022, the acquisition remains subject to closing conditions.

Upon delivery, these vessels will commence long-term charters with leading global liner companies.

In May 2022, Seaspan entered into agreements with a major shipyard to construct four ultra-modern 7,700 TEU dual-fuel liquefied natural gas containership newbuilds. The four vessels are expected to be delivered in the second half of 2024 and first quarter of 2025, and will commence into long-term charters with a leading global liner customer upon completion. The charters include purchase obligations at the conclusion of the charter terms, and will contribute approximately \$0.96 billion of gross contracted cash flow. These vessels are anticipated to be financed through existing liquidity, cash flow from operations, and additional borrowings. As at June 30, 2022, the transaction remains subject to certain closing conditions.

Containership Sale Developments

During the quarter ended June 30, 2022, the Company completed the sale of nine vessels for the gross proceeds of \$224.3 million. Seaspan continues to manage the ship operations of six of these vessels pursuant to management agreements entered into in connection with the sales.

Financing Developments

In April 2022, the Company exercised options to purchase two 10,000 TEU vessels. The purchases are expected to complete in April and May 2023, respectively, at the predetermined purchase price of \$52.7 million per vessel. In August 2022, the Company exercised its option under an existing lease financing option to purchase one 10,000 TEU vessel. The purchase is expected to complete in September 2023 at the pre-determined purchase price of \$52.7 million.

In May 2022, the Company entered into a note purchase agreement to issue \$500.0 million of sustainability-linked, senior secured notes (the “Senior Secured Notes”) in a US private placement. The Senior Secured Notes comprise three series, each ranking pari passu with Seaspan’s existing and future portfolio vessel financing program. The Series A, Series B and Series C Senior Secured Notes were issued on August 3, 2022, with interest rates ranging from 5.15% to 5.49% and maturities from September 2032 to September 2037. The Senior Secured Notes contain certain sustainability features, and are subject to adjustment based on Seaspan’s achievements relative to certain key performance indicators. Seaspan plans to use proceeds from the private placement to pay down existing debt in the portfolio financing program, fund capital expenditures and for other general corporate purposes.

Dividends

On April 1, 2022, the Company declared dividends of \$51.0 million on its common shares to Atlas, which was paid on April 25, 2022.

On July 22, 2022, the Company declared dividends of \$86.1 million on its common shares to Atlas which was paid on July 25, 2022

Recent Changes to Directors and Senior Management

In May 2022, Marilyn Mauritz was appointed Chief Organizational Development Officer of Atlas and Seaspan. In June 2022, Tina Lai resigned as Chief Human Resources Officer of Atlas and Seaspan. In August 2022, Andrew Derksen was appointed as General Counsel of Atlas and Seaspan, effective September 12, 2022.

Impact of Recent Developments in Ukraine

Since February 2022, as a result of the invasion of Ukraine by Russia, economic sanctions have been imposed by the U.S., the EU, the UK and a number of other countries on Russian financial institutions, businesses and individuals, as well as certain regions within the Donbas region of Ukraine. The nature and extent of such sanctions continue to evolve. While it is difficult to estimate the impact of current or future sanctions on the Company’s business and financial position, these sanctions could adversely impact the Company’s operations and/or financial results. Due to volatility in the region caused by the invasion, with the support of our customers, our vessels have ceased trading to Russia for the time being. Given that Ukrainians constitute a significant number of our seafarers, we also anticipate we may face challenges to recruit seafarers in sufficient numbers to replace Ukrainians seafarers who are not able to or permitted to leave their country, as well as Ukrainians seafarers currently onboard our vessels who request to disembark to return home. Finally, we expect that the Russia-Ukraine conflict may exacerbate market volatility, and may impact access to and pricing of capital.

Effects of COVID-19

The impacts of COVID-19 on our business continue unchanged since the date of Seaspan’s Annual Filing filed with the U.S. Securities and Exchange Commission on March 25, 2022, with the most significant impacts being on our ability to conduct crew changes on our vessels and the costs associated therewith. Please read “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Impact of COVID-19 on our Business” in Seaspan’s Annual Filing for more information.

Operating Results

Ownership Days are the number of days a vessel is owned and available for charter. Ownership Days On-Hire are the number of days a vessel is available to the charterer for use. The primary driver of Ownership Days is the increase or decrease in the number of vessels in our fleet.

Total Ownership Days increased by 64 days for the three months ended June 30, 2022, compared with the same period in 2021. The increase was due to the delivery of 11 vessels since Q2 2021 which contributed 613 days. This increase was mostly offset by 549 fewer ownership days from the sale of 11 vessels since Q4 2021.

Vessel Utilization represents the number of Ownership Days On-Hire as a percentage of Total Ownership Days. The following table summarizes Seaspan's Vessel Utilization for the last eight consecutive quarters:

	2020		2021			2022		
	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2
Vessel Utilization:								
Time Charter Ownership Days ⁽¹⁾	10,284	10,520	10,318	10,609	10,946	10,885	10,575	10,291

Vessel Utilization	98.6 %	99.6 %	99.2 %	98.5 %	98.6 %	98.5 %	98.5 %	98.3 %

⁽¹⁾ Ownership Days for time charters and bareboat charters exclude days prior to the initial charter hire date.

⁽²⁾ Unscheduled off-hire includes days related to vessels being off-charter.

Vessel utilization decreased for the three and six months ended June 30, 2022, compared with the same period in 2021 respectively. The decrease was primarily due to an increase in the number of scheduled off-hire days.

Financial Results Summary

Revenue

Revenue increased by 8.0% to \$378.8 million and by 11.9% to \$766.0 million for the three and six months ended June 30, 2022, respectively, compared with the same periods in 2021. The increases in revenue were primarily due to an increase in average charter rates for its existing vessels and contribution from the delivery of 11 vessels after June 30, 2021.

Ship Operating Expense

Operating expense increased by 4.3% to \$77.6 million and by 7.0% to \$152.6 million for the three and six months ended June 30, 2022, respectively, compared with the same periods in 2021. The increases were primarily due to growth in our fleet of operating vessels.

Depreciation and Amortization Expense

Depreciation and amortization expense increased by 7.4% to \$81.5 million and by 5.8% to \$159.9 million for the three and six months ended June 30, 2022, respectively, compared with the same periods in 2021. The increases were primarily due to the growth in our fleet of operating vessels and purchase options being exercised for three vessels in January and April 2022 resulting in a reclassification of the leases from operating to financing.

General and Administrative Expense

General and administrative expense increased by 19.8% to \$11.5 million and by 24.1% to \$23.7 million for the three and six months ended June 30, 2022, respectively, compared with the same periods in 2021. The increases were primarily due to an increase in general corporate expenses including non-cash share-based compensation.

Operating Lease Expense

Operating lease expense decreased by 19.4% to \$29.0 million and by 13.3% to \$61.9 million for the three and six months ended June 30, 2022, respectively, compared with the same periods in 2021. The decreases were primarily due to the lease reclassification from operating to financing as a result of pre-existing purchase options being exercised in January and April 2022 for three vessels.

Interest Expense and Amortization of Deferred Financing Fees

Interest expense decreased by \$3.8 million to \$46.5 million and by \$5.6 million to \$87.4 million for the three and six months ended June 30, 2022, respectively, compared with the same periods in 2021. The decreases were primarily due higher capitalized interest related to an increase in vessels under construction and lower outstanding total borrowings.

Gain on Derivative Instruments

The change in fair value of financial instruments resulted in a gain of \$39.1 million and \$76.5 million for the three and six months ended June 30, 2022, respectively. The gain for this period was primarily due to an increase in the LIBOR forward curve and offset by swap settlements. Based on the current notional amount and tenor of our interest rate swap portfolio, a one percent parallel shift in the overall yield curve is expected to result in a change in the fair value of our interest rate swaps of approximately \$73.6 million.

Our fair value instruments, including interest rate swaps were marked to market with all changes in the fair value of these instruments recorded in "Change in fair value of financial instruments" in our Interim Consolidated Statement of Operations.

The fair value of our interest rate swaps is most significantly impacted by changes in the yield curve. Actual changes in the yield curve are not expected to occur equally at all points and changes to the curve may be isolated to periods of time. This steepening or flattening of the yield curve may result in greater or lesser changes to the fair value of our financial instruments in a particular period than would occur had the entire yield curve changed equally at all points. The fair value of our interest rate swaps is also impacted by changes in the company-specific credit risk included in the discount factor. We discount our derivative instruments in a liability position with reference to the corporate Bloomberg industry yield curves and the fair value of our interest rate swaps in an asset position is discounted by the counterparty credit risk.

In determining the fair value, these factors are based on current information available to us. These factors are expected to change through the life of the instruments, causing the fair value to fluctuate significantly due to the large notional amounts and long-term nature of our derivative instruments. As these factors may change, the fair value of the instruments is an estimate and may deviate significantly from the actual cash settlements realized during the term of the instruments. Our valuation techniques have not changed, and we believe that such techniques are consistent with those followed by other valuation practitioners.

Liquidity and Capital Resources

Liquidity

As at quarter ended June 30, 2022, we have total liquidity of \$1,423.6 million, consisting of \$273.6 million of cash and cash equivalents, \$650.0 million of undrawn commitments under available revolving credit facilities and \$500.0 million in senior secured notes which were issued in August 2022. Our primary short-term liquidity needs are to fund our operating expenses, investments in assets including vessels under construction, debt repayments, lease payments, swap settlements, payment of quarterly dividends and payments on our other financing arrangements. Our medium-term liquidity needs primarily relate to debt repayments, vessel purchase commitments, lease payments and payments on our other financing arrangements. Our long-term liquidity needs primarily relate to potential future acquisitions, lease payments, debt repayments including repayment of our notes, the potential future redemption of our preferred shares and payments on our other financing arrangements. Please read note 8 “Long-term debt”, note 9 “Operating lease liabilities”, note 10 “Finance lease liabilities”, and note 11 “Other financing arrangements” in our interim Consolidated Financial Statements for additional information.

We anticipate that our primary sources of funds for our short-term liquidity needs will be cash from operations, and existing and new credit facilities and other financing arrangements. We anticipate our medium and long-term sources of funds will be from cash from operations, new credit facilities, lease facilities and capital markets financings to the extent available.

The following table summarizes our liquidity as of June 30, 2022 and 2021:

(in millions of US dollars)	June 30,		Change	
	2022	2021	\$	%
Cash and cash equivalents	\$ 273.6	\$ 121.1	\$ 152.5	125.9 %

Total liquidity including newbuild financing	\$ 7,118.2	\$ 5,111.1	\$ 2,007.1	39.3 %

As of June 30, 2022, the Company’s liquidity was sufficient to meet near-term requirements. As of June 30, 2022 the Company had consolidated liquidity of \$1,423.6 million, excluding \$5,694.6 million of committed but undrawn financings related to our newbuild vessels, which represents an increase from \$750.6 million in the prior 2021 period, driven primarily by the expansion of the Company’s unsecured revolving credit facility from \$150.0 million to \$250.0 million, the issuance of \$500.0 million of senior secured notes and an increase in cash and cash equivalents of \$152.5 million, partially offset by the \$179.5 term loan facility which was drawn subsequent to June 30, 2021.

Unencumbered Assets

The Company’s growing base of unencumbered assets is a fundamental objective to achieving an investment grade credit rating, as well as a potential source of liquidity through secured financing or asset sales. Over the long-term, the Company expects its unencumbered asset base to grow as it enhances its presence in the unsecured credit markets, and also naturally as secured borrowings mature or are prepaid.

In the short-term, the Company expects that its unencumbered asset base may fluctuate as unencumbered assets may be sold or financed from time to time, as part of normal course management of assets and liquidity.

The following table provides a summary of our unencumbered fleet and net book value over time.

(in millions of USD)	As at					June 30, 2022
	2017	2018	2019	2020	2021

Contracted Cash Flows

The Company's focus on long-term contracted cash flows provides predictability and reduces liquidity risk through economic cycles. As of June 30, 2022, the Company had total gross contracted cash flows of \$18.4 billion, which includes components that are accounted for differently, including i) minimum future revenues relating to operating leases with customers, ii) minimum cash flows to be received relating to financing leases with certain customers, and iii) contracted cash flows underlying leases for newbuild vessels which have not yet been delivered to customers. The total contracted cash flows of \$18.4 billion includes \$0.96 billion of gross contracted cash flows for four 7,700 TEU vessels which remains subject to closing conditions as at June 30, 2022.

As of June 30, 2022, minimum future revenues on committed operating leases were as follows:

<i>(in millions of USD)</i>	Operating lease revenue ⁽¹⁾	
Remainder of 2022	\$	720.7
2023		1,440.4
2024		1,306.7
2025		907.5
2026		552.2
Thereafter		389.5
	\$	<u>5,317.0</u>

⁽¹⁾ Minimum future operating lease revenue includes payments from signed charter agreements on operating vessels that have not yet commenced

Minimum future revenues assume that, during the term of the lease, (i) there will be no unpaid days, (ii) extensions are included where exercise is at our unilateral option, and (iii) extensions are excluded where exercise is at the charterers' option. Minimum future revenues do not reflect signed charter agreements for undelivered vessels.

As of June 30, 2022, the undiscounted minimum cash flows related to lease receivable on financing leases are as follows:

<i>(in millions of USD)</i>	Lease receivable on financing leases	
Remainder of 2022	\$	48.8
2023		96.9
2024		97.1
2025		96.9
2026		96.9
Thereafter		1,336.6
	\$	<u>1,773.2</u>

As of June 30, 2022, the gross contracted cash flows for its 67 undelivered vessels were as follows:

<i>(in millions of USD)</i>	Gross contracted cash flows ⁽¹⁾	
Remainder of 2022	\$	40.0
2023		384.1

2026		968.9
2027		953.2
Thereafter		7,034.8
	\$	<u>11,276.2</u>

⁽¹⁾ Includes \$0.96 billion of gross contracted cash flows for four 7,700 TEU vessels which remains subject to closing conditions as at June 30, 2022.

The Company is focused on continuing to allocate capital selectively into opportunities that enhance the long-term value of the business and provide attractive risk-adjusted returns on capital, including evaluating synergistic opportunities in adjacent businesses to diversify cash flow drivers.

The Company intends to continue its growth trajectory in 2022, further growing its liquidity through capital recycling and expansion of its revolving credit facilities, diversifying sources of capital to enhance financial flexibility, managing leverage in alignment with its long-term targets, and growing the value of its unencumbered asset base.

The Company's primary liquidity needs include funding our investments in assets including our newbuild vessels under construction, scheduled debt and lease payments, vessel purchase commitments, potential future exercises of vessel purchase options, and dividends on our common and preferred shares.

Borrowings

Operating borrowings⁽¹⁾	\$ 4,173.5	\$ 4,341.9	\$ (168.4)	(3.9)%

⁽¹⁾ Total borrowings is a non-GAAP financial measure which comprises of long-term debt and other financing arrangements, excluding deferred financing fees. The Company's total borrowings include amounts related to vessels under construction, consisting primarily of amounts borrowed to pay installments to shipyards. The interest incurred on borrowings related to the vessels under construction are capitalized during the construction period. Total borrowings and operating borrowings are non-GAAP financial measures that are not defined under or prepared in accordance with U.S. GAAP. Disclosure of total borrowings and operating borrowings is intended to provide additional information and should not be considered a substitute for financial measures prepared in accordance with U.S. GAAP.

The Company's approach is to target a total borrowings-to-asset ratio of 50-60%, and to mitigate credit risk by diversifying its maturity profile over as long a term as economically feasible, while maintaining or reducing its cost of capital. The Company's total borrowings-to-asset ratio was 53.3% as of June 30, 2022 compared to 49.4% at June 30, 2021, the increase was primarily due to other financing arrangements related to the delivery of vessels.

The weighted average interest rate for June 30, 2022 was 4.2% compared to 2.8% at June 30, 2021.

Our Credit Facilities

We primarily use our credit facilities to finance the construction and acquisition of assets. As at June 30, 2022, our credit facilities are secured by first-priority mortgages granted on 61 of our vessels, together with other related security, such as assignments of lease contracts, earnings for our assets, assignments of insurances and management agreements for vessels.

As of June 30, 2022, we had \$1.8 billion outstanding under our revolving credit facilities and term loan credit facilities excluding deferred financing fees. In addition, there is \$650.0 million available to be drawn under our revolving credit facilities.

Interest payments on our term loan credit facilities are based on LIBOR plus margins, which ranged between 0.4% and 2.0% as of June 30, 2022. For a portion of one of our term loans, interest is calculated based on the reference rate of KEXIM plus a margin, which was 0.7% as of June 30, 2022. Two of our term loans bear interest at a fixed rate of 3.8%.

In June, 2022, Seaspan voluntarily prepaid a term loan facility with an outstanding balance of \$225.0 million under its vessel portfolio financing program.

In August, 2022, Seaspan voluntarily prepaid \$240.0 million of another term loan facility under its vessel portfolio financing program.

The Company may prepay certain amounts outstanding without penalty, other than breakage costs in certain circumstances. A prepayment may be required as a result of certain events, including without limitation the sale or loss of a vessel, a termination or expiration of a charter (and the inability to enter into a replacement charter acceptable to lenders within a prescribed period of time). The amount that must be prepaid may be calculated based on the loan to market value. In these circumstances, valuations of the Company's vessels are conducted on a "without charter" basis as required under the credit facility agreement.

Each credit facility contains a mix of financial covenants requiring the Company to maintain minimum liquidity, tangible net worth, interest and principal coverage ratios, and debt-to-assets ratios, as defined. Certain facilities are guaranteed by an intermediate parent entity, in which case the parent entity must meet certain consolidated financial covenants under those term loan facilities including maintaining certain minimum tangible net worth, cash requirements and debt-to-asset ratios.

Some of the facilities also have an interest and principal coverage ratio, debt service coverage and vessel value requirement for the subsidiary borrower. We were in compliance with these covenants at June 30, 2022.

The following is a schedule of key facts relating to the Company's credit facilities as of June 30, 2022:

<i>(in millions of USD)</i>	Scheduled Amortization	Bullet Due on Maturity	Total Future Minimum Repayments	Additional Vessels Unencumbered Upon Maturity	Net Book Value of Vessels Unencumbered

Notes

As of June 30, 2022, we had \$2.0 billion outstanding under notes, \$1.5 billion of which was unsecured, with the remaining \$0.5 billion secured by assets held by the Company. We expect to continue to access the debt capital markets and issue additional series of notes similar to those described below, the proceeds of which may be used to repay other indebtedness, for capital expenditures, or for other general corporate purposes. The Company's outstanding notes are summarized below.

3.75% 2025 Exchangeable Notes

As of June 30, 2022, we had \$201.3 million outstanding under our 3.75% exchangeable senior notes due 2025 (the “Exchangeable Notes”). The Exchangeable Notes were issued in December 2020, and are exchangeable at the holders’ option into an aggregate 15,474,817 Atlas common shares at an initial exchange price of \$13.005 per share, the cash equivalent or a combination thereof, as elected by us, at any time on or after September 15, 2025, or earlier upon the occurrence of certain market price triggers, significant corporate events, or in response to early redemption elected by us. The holders may require us to redeem the Exchangeable Notes upon the occurrence of certain corporate events qualifying as a fundamental change in the business. We may redeem the Exchangeable Notes in connection with certain tax-related events or on any business day on or after December 20, 2023 and prior to September 15, 2025, if the last reported sale price of Atlas shares is at least 130.0% of the exchange price during a specified measurement period. A redemption of the Exchangeable Notes is made at 100.0% of the principal amount, plus accrued and unpaid interest.

Concurrently with the issue of Exchangeable Notes, the Company entered into capped call transactions using \$15.5 million in proceeds from the issuance of the notes. The capped call transactions provide the Company with the option to purchase up to 15,474,817 common shares at a price per share of \$17.85. The capped call is intended to reduce the potential dilution to shareholders and/or offset any cash payments that are required upon an exchange.

Sustainability-Linked NOK Bonds

As of June 30, 2022, we had an aggregate \$500.0 million outstanding under our NOK Bonds. The NOK Bonds were issued in the Nordic bond market in February 2021 (\$200.0 million) and April 2021 (\$300.0 million), bear interest at 6.5% per annum, and mature in February 2024 and April 2026, respectively. Upon maturity, 100.0% of the principal balance is due, or 100.5% if certain sustainability-linked targets are not achieved, except in the event of certain eligible changes in tax law. As of June 30, 2022, the sustainability-linked targets had been achieved, which targeted capital expenditure for projects which mitigate carbon emissions, including LNG vessel technology. Upon the occurrence of a change of control or a delisting event (each as defined in the NOK Bonds), each holder of NOK Bonds will have the right to require the Company to purchase all or a portion of such holder’s NOK Bonds at a purchase price equal to 101.0% of the principal amount thereof plus accrued and unpaid interest, if any.

Blue Transition 5.50% 2029 Notes

As of June 30, 2022, we had \$750.0 million outstanding under our blue transition 5.5% senior unsecured notes due 2029 (the “5.5% 2029 Notes”). The 5.5% 2029 Notes were issued in July 2021, bear interest at 5.5% per annum, payable semi-annually beginning on February 1, 2022, and mature in 2029. The blue transition structure includes designated uses of proceeds for carbon mitigating projects, and was developed to align with the Company’s sustainability efforts.

Sustainability-Linked Senior Secured Notes

As of June 30, 2022, we had \$500.0 million outstanding under our senior secured notes. The notes were issued pursuant to a U.S. private placement with life insurance companies and comprise four series. The Series A, Series C and Series D senior secured notes, totaling \$450.0 million, were issued in May 2021, with interest rates ranging from 3.91% to 4.26% and maturities from June 2031 to June 2036. The Series B senior secured notes, totaling \$50.0 million, were issued in August 2021, with an interest rate of 3.91%, and mature in 2031. The senior secured notes contain certain sustainability features, and are subject to adjustment based on Seaspan’s achievements relative to certain key performance indicators.

Operating Leases

As of June 30, 2022, we had 10 vessel operating lease arrangements. Under 10 of the operating lease arrangements, the Company may purchase the vessels for a predetermined purchase price. As of June 30, 2022, we had total commitments, excluding purchase options, under vessel operating leases from 2022 to 2029 of approximately \$636.3 million.

Based on current market conditions, the Company expects that it will exercise the purchase options under the 10 operating lease arrangements subject to purchase options. These purchase option prices are \$563.3 million in aggregate for the 10 vessels, and if exercised, such purchases would be completed between April 2023 and November 2026. If exercised, the term of the operating leases would be shortened, and the amount paid by the Company under the operating leases (excluding the purchase option price) would be less than the total commitment outlined below. In January 2022, the Company exercised its option to purchase one 10,000 TEU vessel and the lease has been re-assessed as a financing lease for the remainder of its term until the purchase is completed in January 2023 at the predetermined purchase price of \$52.7 million. In April 2022, the Company exercised its options to purchase an additional two 10,000 TEU vessels as described in “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Significant Developments During the Quarters ended June 30, 2022 and Subsequent” above.

As of June 30, 2022, the commitment under operating leases relating to vessels was \$636.3 million for 2022 to 2029, and for other leases it was \$2.2 million for the remainder of 2022 to 2024. Total commitments under these leases are as follows:

<i>(in millions of USD)</i>	Operating leases commitment	
Remainder of 2022	\$	59.2
2023		118.3
2024		120.2
2025		120.4
2026		112.7
Thereafter		107.8
Total	\$	638.6

Capital Commitments

As of June 30, 2022, the Company had 67 newbuild vessels under construction. The Company had outstanding commitments for the remaining installment payments as follows:

<i>(in millions of USD)</i>	Capital Commitment ⁽¹⁾	
Remainder of 2022	\$	660.0
2023		2,755.7
2024		2,433.1
Total	\$	5,848.8

⁽¹⁾ Excludes installment payments for four 7,700 TEU vessels which remain subject to closing conditions as at June 30, 2022

Recently we have seen increasing consensus around expectations for a long-term period of heightened inflation. These expectations align with expectations for our business, as the cost of transport is a major component of inflation, and the underlying demand for our business is closely linked to both global GDP growth and inflation. While we expect these factors to continue to be a net positive for our business, we anticipate that expectations of quantitative tightening and rising interest rates intended to combat inflation may continue to cause volatility in the equity and credit markets near-term, impacting the pricing of our publicly traded securities, notwithstanding strong and stable underlying performance and asset values.

For additional information about our credit and lease facilities and other financing arrangements, including, among other things, a description of certain related covenants, please read “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources” in Atlas’ 2021 Annual Report.

Other Financing Arrangements

We enter into financing arrangements consisting of financing sale-leaseback and failed sales arrangements with special purpose entities, which are consolidated by us as primary beneficiaries. These leases are provided by bank financial leasing owners who legally own our vessels through special purpose entities and are also granted other related security, such as assignments of time charters, earnings for the vessels, insurances for the vessels and management agreements for the vessels. We use these arrangements to finance the construction and acquisition of vessels, as well as certain of our operating vessels.

As of June 30, 2022, we have 28 vessels under these financing arrangements, which provided for borrowings of approximately \$1.6 billion excluding deferred financing fees. Under these agreements, we may voluntarily terminate a lease agreement, subject to payment of a termination fee in certain circumstances. We are also required to prepay rental amounts, broken funding costs and other costs to the lessor in certain circumstances, such as a termination or expiry of a charter (where we do not enter into a charter acceptable to the lessors within a required period of time). If we default under these financing arrangements, our lessors could declare all outstanding amounts to be immediately due and payable and realize on the security granted under these arrangements.

For additional information about our credit and lease facilities and other financing arrangements, including, among other things, a description of certain related covenants, please read “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources” in Atlas’ 2021 Annual Report.

Summary of Consolidated Statements of Cash Flows

The following table summarizes our sources and uses of cash for the periods presented:

<i>(in millions of US dollars)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2022	2021	2022	2021
Net cash flows from operating activities	\$ 219.1	\$ 178.7	\$ 409.9	\$ 350.6
Net cash flows used in investing activities	(149.0)	(643.2)	(235.6)	(846.9)
Net cash flows from (used in) financing activities	52.5	309.7	(69.7)	373.9

For the three and six months ended June 30, 2022 and 2021

Operating Cash Flows

Net cash flows from operating activities was \$219.1 million and \$409.9 million for the three and six months ended June 30, 2022, respectively, an increase of \$40.4 million and \$59.3 million, respectively, compared to the same periods in 2021. The increase in net cash flows from operating activities for the three and six months ended June 30, 2022, compared to the prior year, was primarily due to an increase in revenue from the delivery of 11 vessels since the second quarter of 2021 and higher revenue due to increases in the charter rates in the year. For further discussion of changes in revenue and expenses, please read “Three and Six Months Ended June 30, 2022, Compared with Three and Six Months Ended June 30, 2021” above.

Investing Cash Flows

Net cash flows used in investing activities were \$149.0 million and \$235.6 million for the three and six months ended June 30, 2022, respectively, a decrease of \$494.2 million and \$611.3 million, respectively, compared to the same periods in 2021. The decrease in cash flows used in investing activities was primarily due to the decrease in expenditures related to installments on vessels under construction and an increase in proceeds from vessel sales compared to the same periods in 2021.

Financing Cash Flows

Net cash flows from and used in financing activities were \$52.5 million and \$69.7 million for the three and six months ended June 30, 2022, respectively, compared to net cash flows from financing activities of \$309.7 million and \$373.9 million, respectively, compared to the same periods in 2021. This represents a net decrease of \$257.2 million and \$443.6 million in cash flows from financing activities for the three and six months ended June 30, 2022 compared to 2021. The decrease was primarily due to lower repayments on long term debt and intercompany settlements as well as lower new debt issuances for the quarter ended June 30, 2022 given significant liquidity available to service obligations during the quarter.

Ongoing Capital Expenditures

Ongoing Capital Expenditures

The average age of the vessels in our containership fleet is approximately eight years, on a TEU-weighted basis. Maintenance capital expenditures for our containership fleet primarily relate to our regularly scheduled dry-dockings. During the quarter ended June 30, 2022, we completed five dry-dockings. For the remainder of 2022, we expect eleven additional vessels to complete dry-docking.

We must make substantial capital expenditures over the long-term to preserve our capital base, which is comprised of our net assets, to continue to refinance our indebtedness and to maintain our dividends. We will likely need to retain additional funds at some time in the future to provide reasonable assurance of maintaining our capital base over the long-term. We believe it is not possible to determine now, with any reasonable degree of certainty, how much of our operating cash flow we should retain in our business and when it should be retained to preserve our capital base. The amount of operating cash flow we retain in our business will affect the amount of our dividends. Factors that will impact our decisions regarding the amount of funds to be retained in our business to preserve our capital base, include the following, many of which are currently unknown and are outside our control:

- (1) the remaining lives of our vessels;
- (2) the returns that we generate on our retained cash flow, which will depend on the economic terms of any future asset acquisitions and lease terms;
- (3) future contract rates for our assets after the end of their existing leases agreements;
- (4) our future operating and interest costs;
- (5) future operating and financing costs;
- (6) our future refinancing requirements and alternatives and conditions in the relevant financing and capital markets at that time; and
- (7) unanticipated future events and other contingencies.

Please read “Item 3. Key Information – D. Risk Factors” in Atlas’ 2021 Annual Report for factors that may affect our future capital expenditures and results.

Critical Accounting Policies and Estimates

We prepare our consolidated financial statements in accordance with U.S. GAAP, which requires us to make estimates in the application of our accounting policies based on our best assumptions, judgments and opinions. Our estimates affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosures. We base our estimates on historical experience and anticipated results and trends and on various other assumptions that we believe are reasonable under the circumstances. However, because future events and their effects cannot be determined with certainty, actual results could differ from our assumptions and estimates, and such differences could be material. For more information about our critical accounting estimates, please read “Item 5. Operating and Financial Review and Prospects—E. Critical Accounting Estimates” in Atlas’ 2021 Annual Report.

Recent accounting pronouncements

Discontinuation of LIBOR

In 2021, the Company adopted ASU 2020-04, "Reference Rate Reform (Topic 848)", prospectively to contract modifications. The guidance provides optional relief for the discontinuation of LIBOR resulting from rate reform. Contract terms that are modified due to the replacement of a reference rate are not required to be remeasured or reassessed under FASB's relevant U.S. GAAP Topic. The election is available by Topic. The Company has elected to apply the optional relief for contracts under ASC 470, "Debt", ASC 840 and 842, "Leases", and ASC 815, "Derivatives and Hedging". There was no impact to the Company's financial statements upon initial adoption. The LIBOR replacement modifications for Debt contracts will be accounted for by prospectively adjusting the effective interest rate in the agreements. Existing lease and derivative contracts will require no reassessments. The ASU has not and is currently not expected to have a material impact on our consolidated financial statements.

Debt with conversion and other options

Effective January 1, 2022, the Company adopted ASU 2020-06, "Debt – Debt with Conversion and Other Options (Subtopic 470-20)" ("ASU 2020-06"), using the modified retrospective method, whereby the cumulative effect adjustment was made as of the date of the initial application. Accordingly, financial information and disclosures in the comparative period were not restated. The impact of the adoption of ASU 2020-06 resulted in an adjustment of \$5,073,000 to opening retained earnings at January 1, 2022 related to the unamortized debt discount that was initially recorded when the convertible notes were issued. Under ASU 2020-06, the accounting for convertible debt instruments is simplified by reducing the number of accounting models and circumstances when embedded conversion features are separately recognized. This update also revises the method in which diluted earnings per share is calculated related to certain instruments with conversion features, among other clarifications. As a result of the adoption, the Company recognizes the maximum potential dilutive effect of its exchangeable notes in diluted EPS using the if-converted method effective January 1, 2022.

FORWARD-LOOKING STATEMENTS

This Report on Form 6-K for the quarter ended June 30, 2022, contains forward-looking statements (as such term is defined in Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act) concerning our operations, cash flows, and financial position, including, in particular, the likelihood of our success in developing and expanding our business, include forward-looking statements (as such term is defined in Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act). Statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “continue,” “expects,” “anticipates,” “intends,” “plans,” “believes,” “estimates,” “projects,” “forecasts,” “will,” “may,” “potential,” “should” and similar expressions are forward-looking statements. Although these statements are based upon assumptions we believe to be reasonable based upon available information, including projections of revenues, operating margins, earnings, cash flow, working capital and capital expenditures, they are subject to risks and uncertainties that are described more fully in this Report in the section titled “Risk Factors.”

These forward-looking statements represent our estimates and assumptions only as of the date of this Report and are not intended to give any assurance as to future results. As a result, you are cautioned not to rely on any forward-looking statements. Forward-looking statements appear in a number of places in this Report. These statements include, among others:

- future operating or financial results;
- future growth prospects;
- our business strategy and capital allocation plans, and other plans and objectives for future operations;
- our primary sources of funds for our short, medium and long-term liquidity needs;
- our expectations as to impairments of our vessels, including the timing and amount of potential impairments;
- the future valuation of our vessels and goodwill;
- potential acquisitions, financing arrangements and other investments, and our expected benefits from such transactions;
- future time charters and vessel deliveries, including replacement charters and future long-term charters for certain existing vessels;
- estimated future capital expenditures needed to preserve the operating capacity of our containership fleet and to comply with regulatory standards, our expectations regarding future operating expenses, including dry-docking and other ship operating expenses, and general and administrative expenses
- availability of crew for our containerships, number of off-hire days and dry-docking requirements;
- global economic and market conditions and shipping market trends, including charter rates and factors affecting supply and demand for our containerships;
- disruptions in global credit and financial markets as the result of the COVID-19 pandemic, the Russia-Ukraine conflict or otherwise;
- conditions in the public equity market and the price of our shares;
- our financial condition and liquidity, including our ability to realize the benefits of recent financing activities, borrow and repay funds under our credit facilities, our ability to obtain waivers or secure acceptable replacement charters under certain of our credit facilities, our ability to refinance our existing facilities and notes and to obtain additional financing in the future to fund capital expenditures, acquisitions and other general corporate activities;
- our continued ability to maintain, enter into or renew primarily long-term, fixed-rate time charters with our existing customers or new customers;
- the potential for early termination of long-term contracts and our potential inability to enter into, renew or replace long-term contracts;
- changes in governmental rules and regulations or actions taken by regulatory authorities, and the effect of governmental regulations on our business;
- our continued ability to meet specified restrictive covenants in our financing and lease arrangements, our notes and our preferred shares;

- the length and severity of the ongoing novel coronavirus (COVID-19) pandemic, including as a result of the new variants of the virus, and its impact on our business;
- the financial condition of our customers, lenders and other counterparties and their ability to perform their obligations under their agreements with us;
- our ability to leverage to our advantage our relationships and reputation in the containership industry;
- changes in technology, prices, industry standards, environmental regulation and other factors which could affect our competitive position, revenues and asset values;
- disruptions and security threats to our technology systems;
- taxation of our company, including our exemption from tax on our U.S. source international transportation income, and taxation of distributions to our shareholders;
- our ability to achieve or realize expected benefits from ESG initiatives;
- potential liability from future litigation; and
- other factors detailed in this Report and from time to time in our periodic reports.

Forward-looking statements in this Report are estimates and assumptions reflecting the judgment of senior management and involve known and unknown risks and uncertainties. These forward-looking statements are based upon a number of assumptions and estimates that are inherently subject to significant uncertainties and contingencies, many of which are beyond our control. Actual results may differ materially from those expressed or implied by such forward-looking statements. Accordingly, these forward-looking statements should be considered in light of various important factors, including, but not limited to, those set forth in “Item 3. Key Information—D. Risk Factors” in Atlas’ 2021 Annual Report.

We do not intend to revise any forward-looking statements in order to reflect any change in our expectations or events or circumstances that may subsequently arise. We expressly disclaim any obligation to update or revise any of these forward-looking statements, whether because of future events, new information, a change in our views or expectations, or otherwise. You should carefully review and consider the various disclosures included in this Report and in our other filings made with the Securities and Exchange Commission, or the SEC, that attempt to advise interested parties of the risks and factors that may affect our business, prospects and results of operations.

ITEM 3 — QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk from changes in interest rates and foreign currency fluctuations. We use interest rate swaps to manage interest rate price risks. We do not use interest rate swaps for trading or speculative purposes.

Interest Rate Risk

As of June 30, 2022, our variable-rate credit facilities totaled \$1.8 billion, of which we had entered into interest rate swap agreements to fix the rates on a notional principal amount of \$1.3 billion. As of June 30, 2022, we have an asset of \$66.9 million and a liability of \$9.9 million related to our interest rate swaps.

The tables below provide information about our financial instruments at June 30, 2022 that are sensitive to changes in interest rates. In addition to the disclosures in this report, please read notes 8 to 11 to our consolidated financial statements included in this Report, which provide additional information with respect to our existing credit and lease facilities.

(in millions of US dollars)	Principal Payment Dates							Total

⁽¹⁾ Represents principal payments on amounts drawn on our credit facilities that bear interest at variable rates. We have entered into interest rate swap agreements under certain of our credit facilities to swap the variable interest rates for fixed interest rates. For the purposes of this table, principal payments are determined based on contractual repayments in commitment reduction schedules for each related facility.

⁽²⁾ Represents payments under our operating leases. Payments under the operating leases have a variable component based on underlying interest rates, calculated using the applicable LIBOR in place as at June 30, 2022.

⁽³⁾ Represents payments under our finance leases. Payments under the finance leases have a variable component based on underlying interest rates, calculated using the applicable LIBOR in place as at June 30, 2022.

⁽⁴⁾ Represents payments, excluding amounts representing interest payments, on amounts drawn on our sale-leaseback facilities where the vessels remain on our balance sheet and that bear interest at variable rates.

As of June 30, 2022, we had the following interest rate swaps outstanding:

Fixed per annum rate swapped for LIBOR	Notional amount as of June 30, 2022 (in millions of US dollars)	Maximum notional amount ⁽¹⁾ (in millions of US dollars)	Effective date	Ending date

⁽¹⁾ Over the term of the interest rate swaps, the notional amounts increase and decrease. These amounts represent the peak notional amount over the remaining term of the swap.

Counterparties to these financial instruments may expose us to credit-related losses in the event of non-performance. As of June 30, 2022, these financial instruments are both in the counterparties' favor and our favor. We have considered and reflected the risk of non-performance by us in the fair value of our financial instruments as of June 30, 2022. As part of our consideration of non-performance risk, we perform evaluations of our counterparties for credit risk through ongoing monitoring of their financial health and risk profiles to identify funding risk or changes in their credit ratings.

Counterparties to these agreements are major financial institutions, and we consider the risk of loss due to non-performance to be minimal. We do not require collateral from these institutions. We do not hold and will not issue interest rate swaps for trading purposes.
